

APPROPRIATE TESTING FOR PHARYNGITIS (CWP)

PROVIDER TIP SHEET

This measure assesses the percentage of instances for members 3 years of age and older, where the member was diagnosed with pharyngitis, dispensed an antibiotic, and received a group A streptococcus (strep) test for the episode.

Overuse of antibiotics can lead to antibiotic resistance and negative clinical outcomes for members, such as developing Clostridiodes difficile (C.diff) infections. An increase in antibiotic-resistant infections has continued to be a concern in the United States, with 2.8 million antibiotic-resistant infections resulting in 35,000 deaths occurring each year.¹

Description	CPT Codes/ICD-10 Codes
Group A Strep Tests	CPT: 87070, 87071, 87081, 87430, 87650-87652,87880
Pharyngitis	ICD-10: J02.0, J02.8, J02.9, J03.00, J03.02, J03.80, J03.81, J03.90, J03.91

- Provide same-day appointments, when possible, to avoid unnecessary use of the Emergency Department.
- Educate patients on the differences between viral and bacterial infections and explain why antibiotics are not recommended for viral infections. Discuss the importance of not overusing antibiotics and potential antibiotic resistance with repetitive use.
- Educate members on when they should seek further care (i.e., if symptoms persist for more than three days).
- If prescribing antibiotic treatment, discuss the importance of using the antibiotics appropriately (i.e., completing the entire course of treatment, even if the patient starts to feel better).

Continued on page 2

- Provide instructions on managing symptoms at home with OTC medications.
- Include CPT codes for the Group A streptococcus (strep) test and result when submitting claims.
- Document and code completed screenings with date and results.
- Utilize in-office testing for immediate results.
- Test for Group A streptococcus (strep) prior to prescribing antibiotic treatment.
